Scene 14: Benefits - Felipe

Duration: 16s

Dialogue: Discuss how the AI is much faster than humans

Scene 15: Benefits - Ben

Duration: 13s

Dialogue: Finish - leave it to our platform

FUTURE INNOVATORS - STORYBOARD

Additional information

Each scene will progress to the next via a slide transition. The photos indicate who will be speaking, and that it will be a clip of that person speaking. In some cases, the video will display an image of the user-interface or other graphics with the person speaking in a smaller box in the bottom right of the screen.

FUTURE INNOVATORS - SCRIPT

(1) *FUTURE INNOVATORS LOGO*

(2) Chris - Hi, I’m Chris;

(3) Felipe - I’m Felipe;

(4) Ben - and I am Ben.

(5) Chris - We are here to tell you about our new AI investment platform that allows you to invest in a variety of different stocks, commodities, cryptocurrencies and much more, without the hassles and fees traditionally associated with trading.

(6) Ben - Our platform provides a simple way to start increasing your wealth, without the need of human interaction – our AI saves your time and money by removing from the equation any need for you to seek advice from investment consultants or make difficult decisions.

(7) *IMAGE OF PLATFORM UI with ROYALTY FREE MUSIC*

(8) Felipe - When signing up to the platform you will be required to enter some personal information such as:

- Your age;
- Your amount of savings;
- Your amount of debt;
- Your current assets;
- And your current salary.

(IMAGES POSSIBLE IN CORNER OR SPEAKER RELATED TO DETAILS?)

Afterwards, you will be able to input your investment goals, which the platform will take into account when tailoring an investment plan suited to you.

(9) *IMAGE OF SOFTWARE UI with ROYALTY FREE MUSIC*

- (10) Chris - You will be able to choose:
- Desired stocks, commodities, cryptocurrencies or bundles;
 - The funds that you are willing to spend;
 - The timeframe you'd like to invest over;
 - Your ideal level of risk;

And it's as simple as that – the AI will now trade on your behalf, saving your time and money. You can sit back and watch the dashboard to see the performance of your investments.

(11) *HOW IT WORKS heading with ROYALTY FREE MUSIC*

- (12) Ben - The AI takes into account:
- The current economic climate;
 - Developing political situations that could affect the market;
 - Social media trends and their influence on services, products, and their perception by the general public.
 - Resource demands and breakthroughs in resource extraction
 - Weather forecasts and the possible impact on mining and collecting these resources
 - The financial strength of organisations and governments
 - Logistical data on how these factors could relate
 - And the historical data that could dictate possible trends.

(IMAGES POSSIBLE IN CORNER OR SPEAKER RELATED TO FACTORS?)

The AI is constantly scouring the internet for this information, processing it, and then making smart trades based on that information. This takes the pressure off you, saves you brokerage fees, and allows those who have no trading experience to increase their investments without needing the know-how typically required.

(13) *BENEFITS heading with ROYALTY FREE MUSIC*

(14) Chris - The AI platform will make decisions much faster and much more accurately than humans, who deal with obstacles such as emotions and time restraints.

By the time a person reads the news, understands the implications, gets on the computer and executes a trade, the AI would've already beaten them to the punch, maximising possible returns.

(15) Felipe - The platform is a step ahead of regular trading and can take trades that would not be possible with human reaction time, allowing for better buys and better sells.

This is a tool which is web-based and can be easily accessed by anyone with a computer who wants to invest in a large range of portfolios without having to make the difficult decisions and worry about potential risks.

(16) Ben - So, get started today with our platform. There's no need to have to worry about making decisions and learning the in-depth world of trading – just leave it to the AI, and start accumulating wealth!
